EXPERIENCE

Software Engineer | JM Family - Southeast Toyota Finance August 2024-Present

Technical Skills: C#, Git, Azure, Javascript, HTML, CSS

- Led and executed a system of AI agents to automate repetitive tasks saving 2 months of development hours for a modernization investment
- Involved in design and development of web applications for reporting customer data integrating APIs for business teams to make faster and more accurate analytical decisions
- Developed APIs for ingesting and mapping sensitive customer data between enterprise solutions for persisting and accurate data
- Refactored and deployed business critical function applications to improve existing processes and eliminate unnecessary cloud provider costs
- Collaborated with business teams to provide precise and logical business requirements for myself and other developers across various teams

Development Intern | West Virginia University Textile Department November 2023-May 2024

Technical Skills: Arduino, Git, Fusion 360, 3D printing

- Developed and maintained firmware for various Arduino based projects, demonstrating knowledge of microcontroller programming
- Utilized CAD software to create detailed designs, ensuring precise fit and functionality of 3D printed components
- Collaborated with teams across the world to make an open source textile mills available for no cost

IT Application Intern | Arconic Corporation May 2023-August 2023

Technical Skills: C#, Power Apps, Power BI, SharePoint, PowerShell, Power Automate

- Designed and developed a customer credit request form application for sales associates across the globe to register new clients using C# and PowerApps
- Analyzed and evaluated customer data for approval reports using Microsoft Power BI
- Researched and recorded possible uses for virtual reality and mixed reality to improve factory worker's workflow

PROJECTS

Mobile Outfit Journal - Placard June 2025-Present

Technical Skills: Typescript, React Native, Expo, Figma, Git, PostgreSQL

- Researched user and market needs to design and develop a mobile application for tracking user outfits
- Planned and designed various user flows that provided maximum efficiency for users to provide an immersive and unique user experience
- Developed a multiplatform full stack mobile application with React Native for users across mobile operation systems based on completed research

Live Voting Application - MyVote January 2024-April 2024

Technical Skills: C#, Javascript, React, HTML, CSS, Git, Figma, PostgreSQL, Signal R

- Designed multiple wireframes for team members and presented to business stakeholders for team needs and possible revisions
- Developed a device responsive full stack application for live voting in meetings and events with two team members
- Presented our project with an in depth technical discussion to senior leaders and business stakeholders for possible implementation

TECHNICAL SKILLS

Languages / Frameworks: C#, Javascript, Typescript, React, HTML, CSS, SQL

Design Tools: Figma, Fusion 360, CLO3D, Lucidchart

Database: MySQL, PostgreSQL, Azure Cosmos Database, Azure Blob, Azure SQL Database, SharePoint

Other: Git, .NET, Azure, Expo, Arduino Platform, 3D printing

EDUCATION

West Virginia University - Morgantown, WV
Chambers College of Business & Economics | Honors College
Bachelor of Science in Business Administration
Major: **Management Information Systems**
Minor: Fashion Merchandising

May 2024
GPA: 3.52
